

### Features

- IGBT based inverter and hence more reliable.
- Built in high frequency for GTAW (TIG).
- Digital display for set welding current.
- Compact & light in weight.
- Better welding performance.
- Higher efficiency and better power factor.
- Adjustable post gas time & down slope time in TIG.
- Adjustable arc force in MMA.

Current Range: 30 to 250 Amps

Power Voltage: 220V

60% Duty cycle

I Phase

CC

### Scope of Supply

Power Source, Input Cable, TIG Torch

### Optional Accessories

Argon Regulator  
Flowmeter
